

WASHINGTON WATCH
FEDERAL NEWS
FOR NEW YORK'S RURAL SCHOOLS

RSA SETS NATIONAL AGENDA

Your Rural Schools Association sits on the Steering Committee of the National Rural Education Advocacy Consortium. We make sure the interests of New York State's rural schools are advanced. We help set the direction of the organization and advance our shared agenda.

Last week, RSA Executive Director Dave Little and RSA Board of Director Member and National Issues Liaison Heather Zellers participated in NREAC's annual meeting and Lobby Day. Of course, this year's version was done virtually and despite the physical limitations, we were successful in both meeting with federal representatives and top U.S. Department of Education officials.

We also set the agenda for the group, which both our D.C. advocates and RSA will be advancing throughout the year.

Here is that agenda:

NREAC 2020 Legislative Agenda

Major federal advocacy priorities:

1. Preserve critical federal funding for rural schools
2. Expand and improve federal programs to address teacher shortages in rural communities
3. Ensure rural schools have access to equitable emergency funding and resources to respond to the COVID-19 pandemic
4. Protect rural schools from privatization schemes

Funding for Rural Schools

- NREAC urges Congress to increase funding to the Rural Education Achievement Program by an amount sufficient to grandfather those districts currently receiving RLIS in states that used alternative poverty metrics in order to maintain overall funding to rural schools as intended under current law.
- NREAC urges Congress to maintain formula grants to provide a more reliable stream of funding to local school districts.
- NREAC supports a federal role that prioritizes investment in IDEA and Title I, recognizing them as the federal flagship initiatives. In light of the failure of federal and state governments to maintain special education funding,

districts should be provided greater flexibility to meet the needs of all students.

- NREAC supports additional federal investment in K-12 education to support rural schools in its response to COVID-19 and related economic conditions. NREAC supports significant investment in both state fiscal stabilization funds and the Every Student Succeeds Act Title I and Individuals with Disabilities Education Act categorical funds. NREAC opposes unfunded mandates from the Administration or Congress.
- NREAC believes any competitive funds slated for a 'rural set-aside' or 'rural-only' competition should instead be directed to the Rural Education Achievement Program, a proven formula program that supports rural school innovation. If competitive funds must exist, these competitive funds should cover the cost associated with grant application and management expenses for rural communities.
- NREAC does not endorse competitive grants as a means of funding schools. Whenever competitive funds are created, they must have a 'rural set-aside' or be 'rural-only' and should cover the cost associated with grant application and management expenses for rural schools and communities
- NREAC opposes any across-the-board cuts and the elimination of key education programs.
- NREAC urges Congress to maintain other critical funding streams for rural schools. In particular, REAP, Title II Part A, 21st Century grants, Perkins Career and Technical Education, E-Rate, Regional Education Laboratories, must continue at a minimum of FY19 levels.
- NREAC supports increased funding and access to career and technical education (CTE) in high school and post-secondary programs.
- NREAC supports the reauthorization and re-funding of the Secure Rural Schools program on a permanent basis.

Priorities for the Higher Education Act Reauthorization

- NREAC supports the preservation and expansion of federal grant and loan forgiveness programs that support teachers, especially those that encourage teachers to work in rural districts.
- NREAC supports efforts at the federal level to assist rural districts in addressing teacher and other school personnel shortages through loan forgiveness programs targeted at rural communities and districts.
- NREAC supports the Teacher Quality Partnership grant program, the only federal initiative dedicated to strengthening and reforming educator preparation at institutions of higher education, and opposes the elimination of the program or cuts to its funding.
- Preserve the TRIO program and ensuring it can better serve students in rural schools.

Focus on Rural Schools at the U.S. Department of Education

- NREAC requests that the U.S. Department of Education consider the needs and capacity of rural schools when proposing new regulations, guidance, and technical assistance, and to ensure that any regulations issued are consistent with the spirit and scope of the law.
- NREAC urges the U.S. Department of Education consider the administrative burden of data collection on rural districts. Specifically, the Department should exempt rural school districts from annually responding to the Civil Rights Data Collection and return to a sampling methodology that ensured they were not submitting data annually.
- NREAC recommends that the U.S. Department of Education create an Office of Rural Education Policy to ensure policies, programs and funding streams consider the capacity of rural schools.
- NREAC opposes the reauthorization of the D.C. voucher program, efforts to privatize or redirect federal funds to private schools, voucher programs for military-connected children, attempts to incentivize federal tax credits for

donations to private schools, and proposals to create educational savings accounts for students.

Education Technology

- NREAC believes access to high-speed internet is critical for providing equitable access to learning for students in rural schools. As such, NREAC strongly supports maintaining E-Rate as an element of the Universal Service Fund in its current funding structure. Moreover, NREAC supports increased flexibilities for the allowable uses of E-rate to enable rural schools to utilize education technology that best meets the needs of their communities.
- NREAC supports efforts at the federal level to address the homework gap through expanded access to connectivity at home: including efforts to improve infrastructure for broadband access and increased bandwidth, as well as incentives for providers to continue to expand connectivity options in hard-to-reach or high-cost areas.
- NREAC believes any investment in rural education technology and connectivity in response to the COVID-19 pandemic must be run through the E-Rate program.

Safe and Healthy Schools

- NREAC believes all school districts have a responsibility to maintain a safe and healthy learning environment for students, but geographic and economic challenges in rural communities make this reality more difficult.
- NREAC strongly supports efforts to streamline the paperwork associated with Medicaid claiming as it disproportionately hinders small and rural districts from participating in the Medicaid program and providing critical health and mental health services to children.

- NREAC supports flexible federal formula funding streams to channel resources to rural school districts for school safety that recognize the unique safety needs of each community and school.
- NREAC believes Congress must provide sustained funding to address the increasing mental health needs of children in rural areas including incentivizing the exploration and expansion of teletherapy in rural schools.

School Nutrition

- NREAC supports reimbursing schools when federal food service requirements result in loss of revenue.
- NREAC supports flexibilities to non-congregate feeding requirements associated with the summer food service program.
- NREAC recommends giving districts the option to waive out unfunded federal food service requirements.
- NREAC believes all licensing and certification requirements for school nutrition workers are a state responsibility.
- NREAC opposes efforts to increase the administrative burden around eligibility for free and reduced lunch verification.
- NREAC supports the U.S. Department of Agriculture Farm to Table Program.
- NREAC does not support changes made to the Community Eligibility Provision eligibility threshold.
- NREAC supports an increase in reimbursement for the national school lunch and school breakfast programs.
- NREAC opposes any attempts at turning school nutrition funding into a block grant or consolidated funding stream.

Other Priorities

- NREAC supports efforts to ensure Qualified Zone Academy Bonds are readily available to rural schools and that rural schools are included in any infrastructure package. Any infrastructure proposal in Congress must include funding for modernizing or maintaining rural school facilities.
- NREAC supports a greater federal investment in early education through the coordination and support of new and already existing school-based and community partnerships.
